INTRODUCTION

Green Top Contracting Co. Ltd. (GTC), established in 1977 in Al Khobar, Saudi Arabia, is a prominent industrial contracting company known for its high-quality services across the GCC region. GTC specializes in civil, electrical, mechanical, piping, instrumentation, and IT works, along with maintenance services. The company prides itself on a highly skilled workforce, a commitment to operational efficiency, and an ISO-certified approach (ISO 9001: 2015, ISO 14001: 2015, and ISO 45001: 2018). GTC has earned a strong reputation for delivering tailored solutions to sectors such as oil and gas, utilities, and infrastructure, always prioritizing customer satisfaction and long-term partnerships.

Green Top Contracting Co. (GTI), also a part of Green Top Contracting Co. Ltd., operates under its own Commercial Registration (CR) but shares the same core values and commitment to excellence as GTC. GTI specializes in a range of services including cathodic protection (CP), IT solutions, pest control (PC), and cleaning services. GTI focuses on offering corrosion protection systems, designed and installed specifically for industries such as oil and gas, marine, and utilities. Utilizing advanced technologies and industry best practices, GTI ensures the long-term protection and durability of vital assets.

Both GTC and GTI emphasize safety, environmental responsibility, and high client satisfaction across their operations. Together, they represent a strong commitment to quality, innovation, and sustainability, contributing to the continued growth and development of infrastructure in the GCC region and beyond.

OUR VISION

We provide our clients with high quality work and to be the most preferred Vendors with in our service range. To provide value added services to the customer. We value commitment, integrity, employee morale, loyalty and we embrace the spirit of novelty that acts to realize opportunities to transform our vision into reality.

OUR MISSION

- To create value for our partners through excellence and innovation**
- To be responsible partners with respect to safety and environmental impact of all our operations and services**
- To run the company on a sustainable financial basis of profitable growth**
- To recruit, retain and reward high-performance workforce**

OUR STRATEGY

(GTI) has formulated a strategy for its business organization as whole and ensure that GTI is continuously accomplishing the goals and to develop a mutually rewarding professional service. Along with the strategic planning, GTI's mission and vision are also the management tools for the goals with remarkable achievement on every project in line with Core values as listed but not limited to: Cost Management, Technical Knowledge, and International Expertise.

OUR GOALS

- **In-time accomplishment & On-time delivery of projects**
- **Professional Approach**
- **100% Client Satisfaction**

WHY Green Top ?

Green Top, we are committed to providing our clients with complete packages of Construction Services.

Aside the guaranteed quality and certified reliability of the products we represent, our team of educated professionals(all qualified engineers) will work close with you to provide the best technical advice so you can get the most out of your equipment.

We are active in various crucial industries and in each and every of these areas we:

- Boast decade-long expertise and knowhow.**
- Guarantee optimized solutions, tailor-made to our clients' needs.**
- Offer extensive technical advice, fast response and excellent after-sales support.**
- Keep up with the latest developments, innovations and additions in the industry and technology, to be able to offer products and services of the highest quality standard.**

BUSINESS INFORMATION

At Green Top Contracting Co. Ltd., its team objective is to offer the Saudi Arabian / GCC Market the best Civil-Electro-Mechanical-Piping & Pipeline-IT (Infrastructure) Projects & Maintenance Services and to cater the demand prevailing in the market, Green Top has the following division;

S.NO	ORGANIZATION NAME	COMMERCIAL REGISTRATION NUMBER

OPERATION & MAINTENANCE

GTI is an engineering, construction, operation, and maintenance company, involved in major Substation construction project since 1977. The company serves its customers at every project phase, from strategy formulation through design, project management, and implementation right through to support and upgrades.

Green Top Contracting Co. has worked on detailed construction of various types of major and minor structures, both concrete and steel for commercial, industrial and infrastructure projects, buildings, road networks, industrial support facilities, security perimeter fences, road crossings, retaining wall design, stability analysis, equipment/machine foundations, spread footings, combined footing, mat foundations, beams, columns/piles and all reinforced concrete structures. GTI Performed design analysis for building facilities, in-plant structures, pipe supports and pipe racks, equipment support structures, anchorage, miscellaneous steel structures such as stairways and ladders.

OUR SPECIALIZED SERVICES

- **Substation Building**
- **Industrial Substation Building**
- **Converting Substation Building**
- **Outdoor Substation Building**
- **Pole Mounted Substation**
- **Indoor Substation Building**
- **Switching Substation**
- **Transformer Substation Building**
- **Control Building**
- **Security Building**
- **Pump House**

OUR SPECIALIZED SERVICES

- **Tunnel Basement**
- **Transformer Foundation**
- **Fire Wall**
- **Transformer Track Road**
- **Reactor Foundation**
- **Cable Trenches**
- **GIS Building**
- **Switch Gear Building**
- **Reactor Foundation Firewall**
- **Transformer Firewall**
- **Gantries Foundation**
- **Cable Conveying**

TRANSMISSION LINE AND DISTRIBUTION DIVISION

Green Top is the leading company and working commercial activities since 1995 with Saudi Electricity Company (SEC) with Substations including overhead Transmission line projects. Green Top has extensive experience in the design of MV and LV electrical power distribution for electrical utilities and industry. Green Top provides services in system analysis, feasibility planning, design, supervision and commissioning for electricity transmission and distribution projects.

The company specialized in Power Transmission Lines, Distribution Systems, Substation, Electrical & distributionsystems, solar energy and Communication Systems along with all associated Civil Works including Design, Procurement of Material, Fabrication, Transportation, Erection, Testing and Commissioning. Our success is due to our ability to work efficiently with our clients. Our knowledge in every aspect of our client's needs, allows us to meet their every task.

TRANSMISSION LINE AND DISTRIBUTION DIVISION

OUR SPECIALIZED SERVICES

- **Preparation of technical design assignment for the design project**
- **Feasibility study and selection of the optimal transmission line rout and surveying**
- **Engineering and design for fabrication for the construction of the overhead power line.**
- **Procurement of materials including consumables for installation of transmission lines**
- **Installation of tower stringing of conductors and fiber optic wires for over head lines**
- **Testing and commissioning and maintenance of transmission network**
- **Equipped with own fleet of heavy equipment and tools to handle overhead and underground transmissions line works**
- **Full range of machinery and infrastructure as required for executing over head transmission lines**

TRANSMISSION LINE AND DISTRIBUTION DIVISION

OUR SPECIALIZED SERVICES

- **A dedicated group of highly professionally and experience construction managers, engineers, technical and non technical staffs for various areas of operation**
- **Enhanced with financial capabilities with heritage of experience to handle and operates as many as multiple sites simultaneously**
- **A QHSE and Project Management groups with ever enriched exposure to handle contracts to Project execution**

ELECTRICAL

GREENTOP

Contracting Co. Ltd.,

Our Services encompass the Planning, Design, application and maintenance aspects of medium voltage substations for utility networks and industrial plants.

GTI is an Engineering, Procurement and Construction (EPC) contractor for Over Head Power Lines (OHPL) and executed various ranges for Industrial Sectors which include the OHPL carried out for Saudi Aramco Onshore Maintain Potential Program.

GTI Electrical Engineers have accumulated experience in the field of transmission, distribution and utilization of Electrical Energy. They have experience in substations up to 400KV and have specialized skill in system design & relay selection and co-ordination. In addition, they are experienced in gas & process industries,

GTI we have been entrusted with the management of substantial power projects, including supervision of construction work and plant erection, quality assurance and factory inspections, site testing and final commissioning of plant and systems. The scope of these projects has included both new substations and network reinforcements. We have been responsible for auditing designs and co-ordination of all primary plant (switchgear, transformers, capacitor banks, etc., with the associated protection relaying and telecommunications systems.

OUR SPECIALIZED SERVICES

- **Substation and Transformer Work**
- **OHPL and Services**
- **Industrial Power Solutions**
- **UPS/Generators Frequency Drive**
- **Under Ground Power Distribution**
- **Lighting/Lighting Controls**
- **Building Control and Fire System**
- **Road way & Right-of-Way Restoration**
- **High Mast and Street Light Pole**
- **Motor and Related Control Design**

ELECTRICAL

OUR SPECIALIZED SERVICES

- **Medium Voltage Substation Installation**
- **OHPL and Services**
- **Infrared Acceptance Testing**
- **Transformers**
- **Gas & Oil filled switches**
- **Voltage Circuit Breakers and Regulators**
- **Grounding Systems**
- **Grounding-Fault Protection Systems**
- **Motors and Generators**
- **Reclosers & Line Sectionalizers**
- **Duct Bank, Conduit, Cable Termination and splicing installations**

ELECTRICAL

OUR SPECIALIZED SERVICES

- **Overhead Power Survey and Design**
- **Construction Assembly design**
- **Documentation of Construction specifications**
- **Technical Appraisals and Design Risk Analysis**
- **Grid Connection Management**
- **Site Safety Management**
- **Right of way and Identification**
- **Inspection, Testing, commissioning and Asbuilt preparation**
- **Overhead Line construction / Installation /Assembly on site is professionally carried out by our installers, taking local conditions into account.**

OUR SPECIALIZED SERVICES

- **Power Plants. Turnkey Electrical Power Construction, Industrial Capital Expansion Projects and Control**
- **Electrical Conduits: Perforated sheet metal and plastic trays.**
- **HV conductors & Power transformers installations**
- **LV Power Lines: Electric power cables and control cables, complete diagram. Prefabricated channels “canals” type, in standard and waterproof, both and depth buried.**
- **Switchgears: Switchgear Installations, Metering Switching, General protection boards, power panel boards, energy measurement systems panel boards, control panel boards and centralized automatic management control panel boards**

OUR SPECIALIZED SERVICES

- **Power Generators: Energy emergency supply equipment and or Continuous electrical supply. Generator System Installations**
- **Continuous Power supply: Alternative un interrupted dynamic supply equipment (flywheel).**
- **All Commercial & Industrial Grade UPSs**
- **UPS: Uninterrupted power supply battery equipment, anti harmonic filters, exterior by-pass in simple systems and / or parallel, redundant and / or modular with a block master.**
- **Equipment for Reactive power Compensation & Power Factor: EPC for automatic auto regulated capacitor batteries.**
- **Commercial and/or Diesel Generators**
- **Power Distribution Units**
- **Mechanisms: local control switches for lighting, sockets normal and industrial, remote controls, power control, data ports, etc.**

OUR SPECIALIZED SERVICES

- **Trenching and Pile Placement Work**
- **Duct Banks**
- **Manhole / Hand Hole / Precast Structures**
- **Cable Pulling and Blowing**
- **Construction and Cable Placement**
- **Roadway and Right-of-way restoration**
- **HV conductors, Switchgear & Power transformers installations in underground**
- **Automatic Transfer Switches, Rectifiers & Variable Frequency Drives & Related Equipment**
- **Light Regulation: Automatic lighting control, energy saving, and I or creation of Scenarios for visual comfort and decor including the control electronics, hardware and software, cabling and control sensors Lighting / Lighting Controls and photocells.**

OUR SPECIALIZED SERVICES

- **Interior Lighting: Lighting fixtures including LED Lighting Layout & Installations**
- **Exterior Lighting: Lighting fixtures for road lighting, garden lighting, facade lighting, etc.**
- **High Mast & Street Light Pole (Octagonal, Swaged, Tubular. etc) Works**
- **Industrial, warehouse lighting design and Installation, High / Low HID Fixtures, Airfield /Runway lighting, Parking lot , Street , Site Lighting & Site Electrical Work**
- **Spectacle Lighting: lighting projectors for theaters and performance spaces, including lighting equipment and control wiring Spectacle for lighting projectors for theaters and performance spaces, including lighting equipment and control wiring.**

OUR SPECIALIZED SERVICES

- **Security and Control System Integration**
- **Motor and Related Control Design**
- **Network Design**
- **Installation of fire alarm control panels, life safety systems, voice evacuation systems, and mass notification systems.**
- **Underground Cable Repair, Splicing and Termination**
- **Street Lighting Service, Poles / Octagonal Poles & Panel Erection Services**
- **Calibrate and install instrumentation and related control**
- **Automation applications Emergency Electrical Repair & Restoration**
- **System Protection, Grounding & Grounding Grids : Equipment grounding systems, and general grounding networks, buried bare copper conductors, etc.**
- **Lightning Rods: Franklin type electro-atmospheric catchment, creation of Faraday cages, etc.**

SOLAR ENERGY

GREENTOP
Contracting Co. Ltd.,

Green Top Contracting Co. is positioned to become a leading partner in the solar industry due to our unique partnerships with leading contractors, and technology partners in Kingdom of Saudi Arabia.

Solar Power Generation is an increasingly important source of sustainable energy and it is affordable too. GTI has wide range of expertise in the Solar energy sector. GTI provides Design, Build, Expansion, and maintenance in efficient way and cost effective solar energy facilities from the ground up. GTI is also performing EPC on Wind Power Generation System and Convertors (best-in-class values).

GTI is distinguished through higher electricity yield in actual operating conditions. All our services and technologies are customer-focused and we cater to the home energy system to power plant development whilst providing comprehensive support before and after sales.

Green Top Contracting Co. also possess highly skilled technical persons both in house and as consultants having unmatched experience in the renewable energy field both locally and internationally, ensuring the perfect solution is always provided to our clients.

Our technology is distinguished through higher electricity yield in actual operating conditions. All our products and services are customer-focused and we cater to the home energy systems to power plant development whilst providing comprehensive support before and after sales.

OUR SPECIALIZED SERVICES

- **Grid-Tied (ON Grid) Solar Power**
- **OFF-Grid solar Power Plant Solution**
- **Hybrid Solar Power Plant solution**
- **Solar Water Heater**
- **Installation of Solar Inverter**
- **Solar Inverter and Solar Battery**
- **Testing of Solar Panels**
- **Feasibility Studies and Resource Analysis**
- **Procurement Process**
- **Site Construction Planning**
- **Electrical Design for Low and high voltage**
- **Racking System Design and Installation**

OUR SPECIALIZED SERVICES

- **Foundation Design and Installation**
- **Photovoltaic (PV) Systems assembly and Erection**
- **Underground Cabling Installation and Substation & Interconnection facilities**
- **Wind Power Generation: Wind turbines, Energy storage element and control for injection into utility power grids.**
- **Solar Photovoltaic Power Generation: high efficiency photovoltaic conversion, energy storage elements and control for injection into utility power grids. Constructing State-of-the-art photovoltaic facilities that reduce energy costs**

Green Top Contracting – leading provider of cathodic protection systems, engineering services, materials and equipment supply with a deserved reputation for delivering high profile projects within budget, on time on the global stage. With an established track record covering high pressure oil and gas pipelines, storage facilities, concrete and marine structures nobody is better positioned to provide you with a solution to your corrosion needs.

GTI provides design, installation and maintenance services related to Cathodic Protection (CP) Drilling, DS/TA Measurements, Anode, Coke Breeze Installation. GTI has executed various ranges especially to major projects pertaining to Saudi Arabia

Reducing emissions may occur in any phase of oil and gas development. The GTI offers a set of innovative services that apply to transportation, production, monitoring and maintenance. Use of these techniques will reduce project emissions and thus prevent significant impacts.

Complete cathodic protection program; For the optimal maintenance of your pipeline infrastructure and in order to avoid corrosion, or even worse leakages, cathodic protection is indispensable. The Sniffers offers a complete control and optimisation program. We visualise and outline the critical points in your cathodic protection system.

OUR SPECIALIZED SERVICES

- **Anode bed Drilling and Earth Resistance Measurement**
- **Anode Installation**
- **Transformer Rectifier Installation**
- **Cathodic Protection Construction**
- **Cathodic Protection Pre-commissioning**
- **NACE CP Level 2 Supervision**
- **CP Consultations**
- **CP Maintenance and Potential Survey**

1. Anode Bed Drilling and Earth Resistance Measurement

Green Top Contracting Co. specializes in precise anode bed drilling and comprehensive earth resistance measurement, adhering to Saudi Aramco Standards to ensure optimal effectiveness.

Our services include:

- **Site Assessment:** Thorough evaluations conducted in compliance with Saudi Aramco guidelines to determine the best locations for anode beds, considering soil conditions and environmental factors.
- **Drilling Operations:** Skilled technicians utilize advanced drilling techniques to install anodes at specified depths, ensuring optimal performance and longevity while following industry best practices.
- **Earth Resistance Measurement:** Accurate measurements of soil resistivity to evaluate the effectiveness of cathodic protection systems, using methodologies that meet Saudi Aramco Standards. This data informs the design of the CP system and ensures compliance with all regulations.

2. Anode Installation

Proper installation of anodes is critical for the efficiency of cathodic protection systems.

Our anode installation services encompass:

- **Selection of Anodes:** A detailed analysis to select the most suitable anode type—be it sacrificial (such as zinc or magnesium) or impressed current anodes (such as titanium or mixed metal oxide)—based on project-specific requirements, environmental conditions, and operational factors. This assessment is conducted in accordance with Saudi Aramco Standards to ensure optimal performance and longevity.
- **Expert Installation:** Our team ensures that anodes are installed correctly and securely, maximizing their effectiveness while strictly adhering to Saudi Aramco's best practices throughout the installation process.
- **Integration with CP Systems:** Seamless integration of anodes with the overall cathodic protection system, optimizing performance and safety in line with Saudi Aramco Standards.

3. Transformer Rectifier Installation

Overview

Transformer rectifiers are essential components in cathodic protection systems, designed to safeguard metal structures from corrosion. Our expert team specializes in the installation of these systems, ensuring optimal performance and longevity for your assets.

Site Assessment and Planning

- Conduct comprehensive site evaluations to determine specific cathodic protection needs.
- Develop customized installation plans tailored to your infrastructure and environmental conditions.

Transformer Rectifier Installation

- Expert installation of transformer rectifiers, ensuring proper integration with existing cathodic protection systems.
- Use of high-quality, durable equipment to guarantee long-term reliability and efficiency.

Electrical and Grounding Setup

- Proper electrical connections to maximize the effectiveness of the cathodic protection system.
- Grounding systems designed to enhance safety and performance.

System Integration

- Seamless integration of the transformer rectifier with existing monitoring and control systems.
- Ensure compatibility with various cathodic protection methods, including impressed current and galvanic systems.

Testing and Commissioning

- Thorough testing of the installed transformer rectifier to confirm functionality and compliance with industry standards.
- Detailed commissioning processes to ensure the system operates at peak efficiency.

Maintenance and Support

- Ongoing maintenance services to ensure long-term system reliability.
- Technical support and troubleshooting services available as needed.

Training and Consultation

- Training sessions for your staff on system operation and maintenance.
- Expert consultation services for future upgrades and enhancements.

4. Cathodic Protection Construction

Cable Laying and Installation

- **Cable Preparation:** Supply and prepare high-quality cables designed for durability and conductivity in cathodic protection applications.
- **Laying Techniques:** Utilize industry-standard techniques to lay cables efficiently and securely, minimizing disruption to the surrounding area.

Cable Trenching

- **Trench Design and Excavation:** Design and excavate trenches based on project specifications, ensuring proper depth and alignment for cable installation.
- **Trench Backfilling:** Fill trenches with appropriate materials to provide stability and protection for the cables, ensuring long-term performance.

Civil Works for CP System Installation

- **Concrete Foundations:** Construct concrete pads and foundations for transformer rectifiers and anode beds, ensuring robust support.
- **Access Roads and Pathways:** Build access roads or pathways for installation and maintenance activities, ensuring safe and efficient movement around the site.

5. Cathodic Protection Pre-Commissioning

Prior to the commissioning of cathodic protection systems, we offer thorough pre-commissioning services to ensure readiness and compliance with Saudi Aramco Standards.

This includes:

- **System Testing:** Comprehensive testing of all components of the cathodic protection system to verify functionality and performance according to established guidelines.
- **Initial Measurements:** Baseline measurements of potential and current to establish performance metrics for ongoing monitoring.
- **Documentation and Reporting:** Detailed documentation of pre-commissioning activities, including test results and compliance checks, ensuring transparency and accountability.

6. NACE CP Level 2 Supervision

Our services include NACE (National Association of Corrosion Engineers) CP Level 2 supervision, ensuring that cathodic protection projects meet both industry and Saudi Aramco Standards.

This includes:

- **Qualified Supervision:** NACE-certified professionals oversee all aspects of cathodic protection installation and maintenance, providing expertise and guidance throughout the project.
- **Quality Assurance:** Rigorous quality control measures are implemented to ensure compliance with Saudi Aramco Standards, enhancing the reliability and effectiveness of the CP system.
- **Training and Support:** On-site training and support to ensure that all team members are knowledgeable about cathodic protection practices and safety protocols.

7. CP Consultations

We offer expert consultations to help clients navigate the complexities of cathodic protection and corrosion management, ensuring alignment with Saudi Aramco Standards.

Our consultation services include:

- **Corrosion Risk Assessments:** Comprehensive evaluations of existing infrastructure to identify corrosion vulnerabilities and recommend appropriate CP solutions.
- **System Design Guidance:** Expert advice on the design and implementation of cathodic protection systems tailored to specific industry needs and environmental conditions.
- **Regulatory Compliance Assistance:** Support in understanding and complying with local and international regulations related to cathodic protection and corrosion management.

Through these specialized services, Green Top Contracting Co. demonstrates its commitment to providing effective cathodic protection solutions that enhance asset integrity, safety, and longevity, all in accordance with Saudi Aramco Standards.

8. CP Maintenance and Potential Survey

At Green Top Contracting Co. (GTI), we specialize in conducting comprehensive Cathodic Protection (CP) potential surveys to assess the effectiveness and integrity of your CP systems. Our detailed evaluations ensure that your infrastructure remains protected against corrosion and operates within industry standards.

Our Potential Survey Services Include:

1. Comprehensive Potential Measurements:

- Conducting thorough measurements of pipeline and structure potentials using industry-standard techniques.
- Evaluating both on-site and remote locations to ensure complete coverage.

2. Detailed Reporting:

- Generating comprehensive reports that include survey results, potential readings, and comparative analysis against established benchmarks.
- Providing clear recommendations for any necessary adjustments or enhancements to the CP system.

3. Compliance Checks:

- Ensuring that your CP system meets all regulatory requirements and industry standards.
- Identifying any areas of concern that may require immediate attention or further investigation.

4. Data Analysis:

- Analyzing survey data to identify trends and potential risks associated with corrosion.
- Using advanced data analytics to offer insights that can guide maintenance and operational strategies.

INSTRUMENTATION

Looking for high quality electrical measuring instruments complying with international standards and an organization with world class customer service? Green Top Contracting Co. is exactly what you have in mind. An established brand name for over 46 years; Green Top has an unrivaled pedigree in the industry; our dedicated research and development facility ensures that the latest technology is utilized in our digital products whilst our traditional analog range continues to perform through the test of time.

Undertaken evaluation of new plant Emergency Shutdown System (ESD) and upgrading, using microcomputer-based Programmable Logic Controllers (PLC). Designed installation details of process analyzers, such as Gas Chromatographs, environmental process monitors, on-line process fluid property analyzers, metering systems for gas & liquid, gas detection and pipeline leak detection systems (LDS). Designed protective instrument devices for rotating machineries including vibration, temperature, and speed monitoring from field to control room

The instrumentation group provides procurement support development by preparing individual data sheets and specifications for each state-of-the-art device and sub-system in the control system. This design function requires coordination and selection of manufacturers and vendors who assist at the pre-procurement stage to supply data and expertise used in selecting the most appropriate device to the task.

OUR SPECIALIZED SERVICES

- **Analog Panel Meters**
- **Analog Industrial Meters**
- **Multifunction Meters**
- **Electrical Transducers**
- **Digital Multimeters**
- **Insulation Testers**
- **Analog Switch Board Meters**
- **Current Transformers**
- **Digital Panel Meters**
- **Single Conditioners**
- **Clamp Meters**
- **Temperature Controllers**

TELECOMMUNICATION

Our communication design systems are always based on client's standards and specifications backed-up by our own extensive experience. Recent design technology includes Intrusion Detection and Assessment Systems (IDAS), which detect, assess, trace and video record potential intrusion for various facilities/plants.

Also, Long Range Detection and Assessment System (LRDAS) which, detect, tract and report movement of vehicles and personnel anywhere within 10-km radius

undertaken design of telecommunication systems VSAT, Microwave, Optical Voice & Data Systems, comprising of modems & routers, copper and Fiber Optic Cables (FOC). Designed CCTV, CATV, telephony for buildings and industrial facilities

Performed design of communication links from pipeline monitoring & control equipment through RTU & modems (FOC or via VSAT) providing data acquisition & control to OSPAS. Designed industrial security systems such as IDAS, LRDAS and HCIS compliant industrial security systems, i.e. security fencing, gatehouses, etc.

Our engineers possess years of high-quality experience in the communication field. We can also provide construction support / management and client training services.

OUR SPECIALIZED SERVICES

- **Process Control System**
- **Corporate Connectivity Solution**
- **Telepresence**
- **Unified Communication**
- **Unified Network Infrastructure**
- **LAN and Switching Solution**
- **WAN and Routing Solutions**
- **Network Audit Services**
- **Internet Connectivity Solutions**
- **Integrated Physical Security Systems**
- **Plant Communication System**
- **IP Network System**

INFORMATION TECHNOLOGY

BMS & LOW VOLTAGE

BMS Centralized technical management systems, control set points for air conditioning, networks analyzers for energy control, engine performance, automatic switching transformers and generators, detection of water and gas leaks, the performance of electrical circuits, etc., including hardware, software, custom programming, actuators, electronic substations, computers, bus, and multicore wiring, probes, etc., Historical alarm generation and management, changing setpoint and scheduling and programming.

Low Voltage installations are strategically important and GTI has the technical expertise for installations with quality requirements and according to the relevant standards demand. Combine the experience and knowledge of GTI's technical staff with the abundant resources are the keys for this project accomplishment.

OUR SPECIALIZED SERVICES

- **Data Communication**
- **Wireless Solution**
- **Public Address**
- **RFID**
- **CCTV/ Fire Alaram**
- **Access Control**
- **Master Clock System**
- **Data Centre Solution**
- **Fibre Optic Solution**
- **Switching/ Routing**
- **Server Solution**
- **Bird Repeller**
- **Data Environment Control System**

INDUSTRY BACKGROUND

The IT services industry plays a vital role in supporting organizations across various sectors by providing essential infrastructure and security solutions. As businesses increasingly rely on technology, robust IT infrastructure ensures seamless operations while security solutions safeguard sensitive data from evolving cyber threats. This foundational layer is critical for maintaining operational integrity and building customer trust.

In addition to infrastructure, enterprise business solutions are integral to enhancing organizational efficiency and decision-making. By integrating systems such as ERP and CRM, businesses can streamline processes, improve collaboration, and gain valuable insights from data analytics. This interconnected approach allows companies to respond more effectively to market demands and optimize their resources.

Moreover, the rise of e-learning and training solutions reflects the growing need for continuous skill development in a rapidly changing technological landscape. Coupled with engineering IT services and innovative AI solutions, these offerings enable organizations to enhance their capabilities, drive innovation, and remain competitive. The combination of these services underscores the importance of a comprehensive IT strategy in today's digital economy.

SERVICES

IT INFRASTRUCTURE & SECURITY SOLUTIONS

Green Top Company offers comprehensive IT infrastructure management, ensuring that businesses have a reliable and scalable technology foundation. This includes:

NETWORK DESIGN AND MANAGEMENT

Green Top tailors solutions to optimize network performance and security.

SERVER AND STORAGE SOLUTIONS

The company implements and manages physical and cloud-based servers, ensuring data integrity and availability.

CYBERSECURITY SERVICES

The solutions offered need to be based on sound market decisions so that they can have an impact.

SERVICES

WEB APPLICATIONS

At Green Top, we specialize in crafting bespoke web applications tailored to your unique needs. Our team of skilled developers leverages the latest technologies to create solutions that streamline your processes, enhance efficiency, and drive growth.

E-COMMERCE PLATFORMS:

Build robust online stores to showcase and sell your products or services.

CONTENT MANAGEMENT SYSTEMS

Easily create, manage, and publish content on your website with our constant guidance.

MOBILE APPS:

Extend your reach and engage customers on the go with native mobile apps.

SERVICES

DIGITAL MARKETING

In today's competitive digital landscape, effective marketing is essential for success. Greentop offers a comprehensive suite of digital marketing services to help you reach your target audience and drive results.

SEARCH ENGINE OPTIMIZATION (SEO):

Improve your website's visibility in search engine results.

SOCIAL MEDIA MARKETING:

Engage with your audience on popular social media platforms.

CONTENT MARKETING:

Create high-quality content to attract and retain customers.

SERVICES

ENTERPRISE BUSINESS SOLUTIONS

Green Top Company provides enterprise-level solutions that help organizations streamline operations:

ERP IMPLEMENTATION

Green Top customizes ERP solutions that integrate core business functions, from finance to supply chain management.

CRM SYSTEMS

The company designs solutions to enhance customer relationship management and improve client interactions through data-driven insights.

BUSINESS INTELLIGENCE

Green Top offers data analytics tools that help businesses make informed decisions based on real-time data analysis and reporting.

SERVICES

E-LEARNING & TRAINING

Recognizing the importance of continuous education, Green Top offers:

CUSTOM E-LEARNING DEVELOPMENT

Green Top creates tailored online training programs that meet specific organizational needs, enhancing employee skills and knowledge.

LEARNING MANAGEMENT SYSTEMS (LMS)

The company implements platforms to manage, deliver, and track training programs efficiently.

WEBINARS AND WORKSHOPS

Green Top hosts interactive sessions that provide up-to-date training on industry trends and technologies.

SERVICES

ENGINEERING IT SERVICES

Green Top Company supports engineering firms with specialized IT services

CAD AND DESIGN SOFTWARE SUPPORT

The company assists in selecting, implementing, and maintaining software solutions for design and modeling.

PROJECT MANAGEMENT TOOLS

Green Top offers customized solutions to facilitate effective project tracking and collaboration among engineering teams.

SIMULATION AND TESTING SERVICES

Providing tools and expertise for virtual testing, Green Top ensures that engineering projects meet quality standards before execution.

SERVICES

PRODUCTS & SERVICES

Green Top offers a wide range of IT products and services to enhance business operations:

HARDWARE SOLUTIONS

The company handles procurement and setup of servers, workstations, and networking equipment tailored to business needs.

SOFTWARE DEVELOPMENT

Green Top develops custom software solutions designed to solve specific business challenges and improve efficiency.

CLOUD SERVICES

With cloud migration and management services, Green Top Company enables businesses to leverage the scalability and flexibility of cloud technology.

SERVICES

AI - ARTIFICIAL INTELLIGENCE SOLUTIONS

Green Top is at the forefront of AI technology, providing solutions that enhance business intelligence and efficiency:

MACHINE LEARNING APPLICATIONS

The company develops predictive models that analyze data patterns and improve decision-making processes.

NATURAL LANGUAGE PROCESSING (NLP)

Green Top implements AI-driven chatbots and virtual assistants to enhance customer service and engagement.

AUTOMATION SOLUTIONS

By streamlining repetitive tasks through automation, Green Top allows employees to focus on higher-value work.

Green Top Contracting Co. Ltd.(GTI) is an Engineering, Procurement &Construction (EPC) company, involved in major construction projects since 1977. GTI offers Mechanical Works which include Plumbing, Sewage, and Drainage work.GTI offer reliable, efficient and top-quality drainage, plumbing and sewage systemsfor all types of industrial or infrastructure systems.

GTI has a proven and professional track record in the design of numerous installations in Oil & Gas, Petrochemical Plants, Desalination Plants, Steam and Power Generation Plants, Industrial Plants and Buildings. Such design work is in support of plants currently in operation that require upgrade or specific modifications.

Providing specific technical scope for the procurement of specialized process equipment such as: receiver\launchers, knockout drums, filters, pressure vessels, fired heaters, heat exchangers, coolers, pumps and compressors, turbines, and other specialized rotating equipment. They also provide the technical support data for interface loads between equipment and supporting structures.

Provide piping design for potable hot & cold water, waste water, raw water storage, air distribution piping for pneumatic tools, and other mechanical service products such as oil & greases.

OUR SPECIALIZED SERVICES

- **Platforms with Gratings & Plates**
- **HVAC System Ducting & Units Installations**
- **Fire Protection System**
- **Pumps & Generators**
- **Outdoor Gas Installations**
- **Compressed Air Installations:**
- **Tubing, Valves and Gates**
- **Water Pumps**
- **Variable Flow Boxes**

GREEN TOP CONTRACTING CO., a piping construction company, has been providing industrial piping services with best-in-class experience in all aspects of the industry. Throughout our long history, GREEN TOP has established key relationships with major pipe manufacturers which can reduce costs for the project owner. Whether the project requires slip-lining, large diameter pipe, or connecting complicated mechanical systems, we provide quality and timely results.

Over the past two decades, GTI's piping design specialists have been designing flowlines for Saudi Aramco which includes installation of the wellhead tree, well site piping, laterals and flanks leading to the GOSPs, water supply piping, water injection piping and water disposal piping. Additionally, GTI has provided detailed design of piping systems within the GOSPs and other facilities.

In relation to design plant infrastructures, GTI has also furnished piping for site development, compressed air and other gas systems, firewater, fire protection systems, plumbing, sewer and chilled water system. An integral part of the piping team also includes civil and structural engineers who are involved in the design of pipe supports and structures.

OUR SPECIALIZED SERVICES

- **Process Piping**
- **Gas Plant**
- **Refinery**
- **Fertilizer**
- **Procurement**
- **Erection**
- **Utility Piping**
- **Petrochemical**
- **Power Plant**
- **Water Treatment**
- **Installation**
- **Planning**

PIPELINE

Green Top Contracting Co. is a leading Industrial General construction Contractor operating across Middle East. We cater our expertise in Oil & Gas, Petrochemical sectors, Ferrous and Non Ferrous industries , Buildings (Industrial, commercial and High Rise), O&M and comprehensive construction Management services through our operations spanning across Saudi Arabia.

Prepared design and construction packages for oil and gas pipelines, including wellhead piping, flowlines, trunk lines and cross-country pipelines in all classifications, underground, surface pipelines on sleepers or on pipe supports and pipe racks for crude oil, gas, water and chemical liquid conveyance and transportation.

Experience included, but not limited to, in-plant pipe engineering and designs for refinery, gas and oil separation plants (GOSPS), crude stabilizers, utilities and power piping. Conducted flexibility & stress analysis of various piping systems, steam lines, crude oils, gas lines, NGL, and high-pressure water lines using CAESAR II program, both as standalone project and part of the whole project.

Conducted upgrading of oily water and sewer s ystem, design calculations, hot tap packages and reviews of existing piping/pipeline network.

OUR SPECIALIZED SERVICES

- **Flow Line**
- **Trunk Line**
- **Oil and Gas Header**
- **Scraper Trap**
- **Well Head Piping**
- **Fabrication**
- **Installation**
- **Testing**
- **Commisioning**
- **Procurement**
- **Material supply**
- **Gas PWR WS**

OPERATIONS & MAINTENANCE (O&M)

GREENTOP
Contracting Co. Ltd.,

Green Top Contracting Co. provide preventive maintenance services by conducting periodic inspections, parts replacement and equipment cleaning. Our preventive maintenance programs anticipates and prevents equipment failures. Since 1977, we have provided preventative maintenance services to various clients such as: Aramco, Sabic, SEC, SWCC, ministries and corporate clients.

Our operational service processes are executed according to our own internal procedures, quality standards and service concepts and in line with the respective OEM's standard operating procedures. We implement continuous improvement to ensure the highest level of customer satisfaction.

OPERATIONS MAINTENANCE (O&M)

OUR SPECIALIZED SERVICES

- **Supervisor**
- **LMV Driver**
- **AC Technician**
- **Air Conditioning**
- **Electrician**
- **Split Air Conditioner**
- **Machinery**
- **Chilled Water AC System**
- **Plumber**
- **Cleaning Materials**
- **Male/ Female Janitor**

PEST CONTROL & CLEANING SERVICES

GREENTOP
Contracting Co. Ltd.,

Green Top is dedicated to creating a pest-free environment for its clients across the GCC region. As a trusted division of Green Top Contracting Co. (GTI), we offer comprehensive pest management services for residential, commercial, and industrial sectors.

Our solutions are designed to effectively eliminate pests while prioritizing safety, hygiene, and environmental responsibility. With the use of advanced techniques and eco-friendly products, we ensure long-term results and a healthier, pest-free environment. Committed to customer satisfaction, Green Top Pest Control works to protect properties and enhance well-being by providing reliable and efficient pest control services.

OUR SERVICES

1 PEST CONTROL

- Understanding habitat and behaviour of pests.
- Using specific chemicals to target each pest.
- Identify possible pest entry way and seal them.
- Follow up inspection so that pests are fully eradicated.
- Fogging for insects.
- Garden treatment.

2 RODENT CONTROL

- Rodent Bait Application.
- Rodent Bait Station.
- Identify Rodent entry way and seal them.

3 BIRD CONTROL

- Bird Repellant.
- Bird Nets.
- Anti-Bird Spikes

OUR SERVICES

4

TERMITE CONTROL

- Pre-Construction Termite Control
- Post Construction Termite Control

4.1

PRE-CONSTRUCTION TERMITE CONTROL

- Soil Treatment Below and Along.
- External Perimeters of the building
- Foundation Treatment.
- Treatment of Plinth Area.
- Treatment at junctions of floor and walls.

4.2

POST CONSTRUCTION TERMITE CONTROL

- Treatment of floor and wall junctions.
- Treatment of wooden infrastructures.
- Treatment of termite surrounding Building Foundation.

CLEANING SERVICES

GREENTOP
Contracting Co. Ltd.,

Green Top Cleaning Services is committed to delivering a clean, safe, and healthy environment for all our clients across the GCC region. As part of Green Top Contracting Co. Ltd. (GTI), we provide comprehensive cleaning solutions for residential, commercial, and industrial spaces.

Our services are designed to maintain high standards of cleanliness and hygiene using the latest equipment and eco-friendly cleaning products. Whether it's regular maintenance or specialized cleaning projects, we ensure that every space we manage is spotless, safe, and conducive to a healthy environment. With a strong focus on customer satisfaction, Green Top Cleaning Services is dedicated to creating pristine environments for our clients.

OUR SERVICES

1 GENERAL CLEANING

- Our general cleaning service is designed to keep your space tidy and welcoming. Whether it's your home, office, or commercial facility, our team provides thorough cleaning to ensure a clean and healthy environment.

2 DEEP CLEANING

- Our deep cleaning service goes beyond the surface, targeting hidden dirt and allergens in your space. Ideal for seasonal cleaning or post-event cleanups, this service ensures a comprehensive cleanse.

3 FACADE CLEANING

- Enhance the appearance of your property with our facade cleaning service. We specialize in cleaning various surfaces, including brick, glass, and concrete, restoring your building's exterior to its original glory.

OUR SERVICES

4

SWIMMING POOL CLEANING

- Keep your swimming pool sparkling clean and safe for swimming with our professional pool cleaning service. We ensure your pool is maintained year-round, so you can enjoy it to the fullest.

5

WATER TANK CLEANING

- Our water tank cleaning service ensures that your water supply remains safe and uncontaminated. Regular cleaning is crucial for maintaining the quality of water and preventing health risks.

COMPANY HISTORY

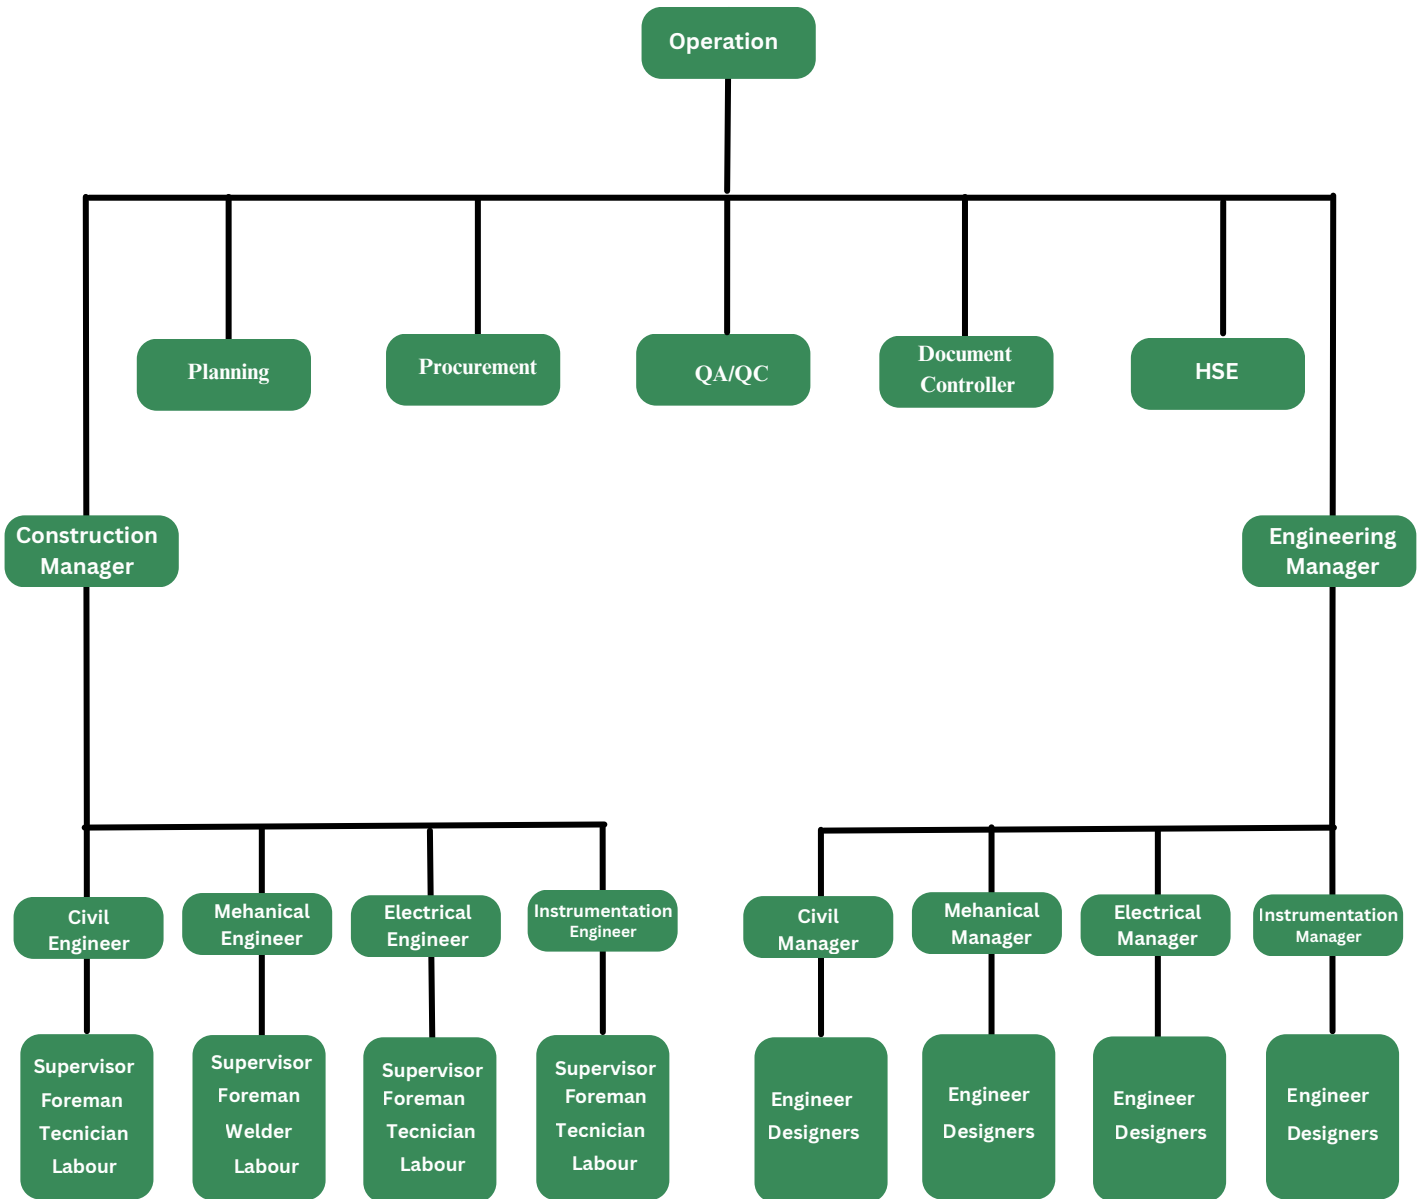

Head Office Organization Chart

PROJECT ORGANIZATION CHART

Green Top Health & Safety

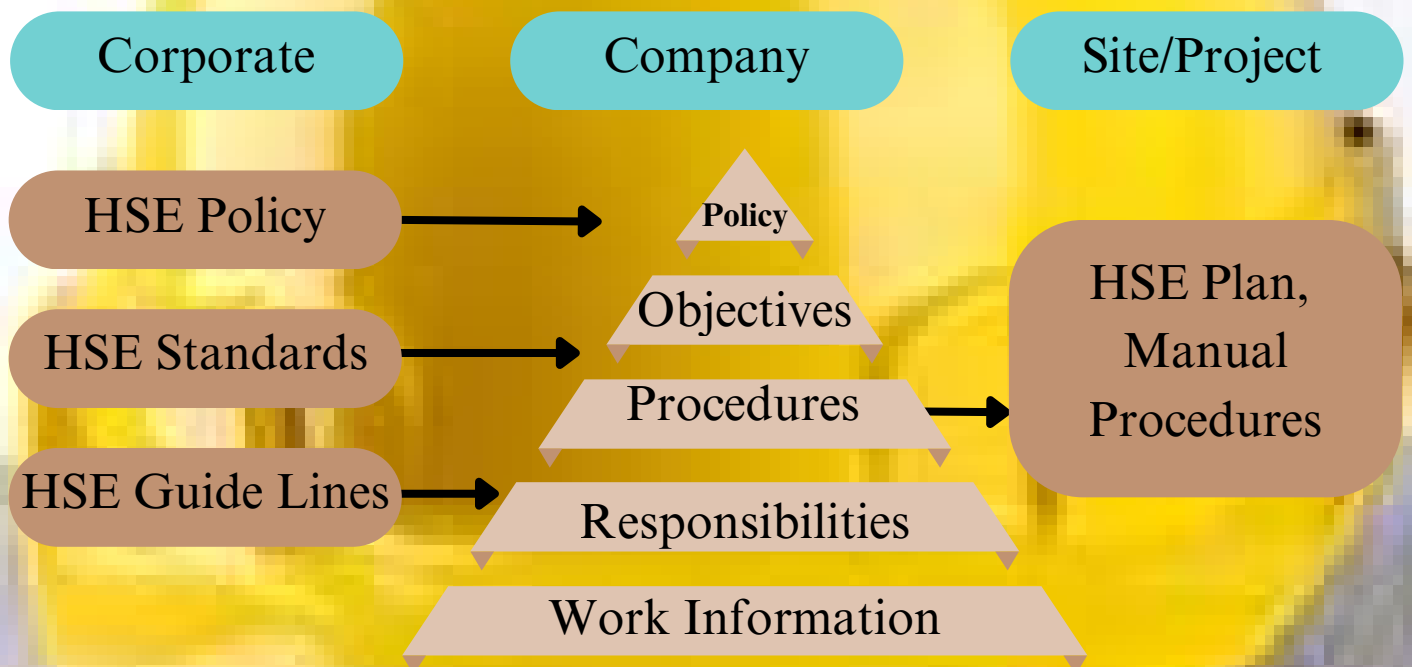

Green Top Contracting Co. primary concern is the safety of its employees and every possible effort to mitigate the potential of risk seems less when one considers the changing scenarios that evolve on a daily basis in a business like ours. But we at Green Top challenge every hazard and endeavor to bring down the risk to a manageable level before our employees have to deal with it.

The implementation of our Occupational Health and Safety program is directed by the top level management, so as to ensure that all aspects under this domain are included in the program and managed as well as implemented to keep all personnel safe.

Our Safety programs include Hazard Identification, Risk Assessment, Training & Communication including the awareness of statutory and regulatory requirements, Documents & Records Control for effective analysis and development of safe work plans. These also include Identification of Emergency Situations and Defining of Response Plan, OH&S Performance Monitoring, Accident/Incident Investigation, Corrective & Preventive Action, Internal Audits, Management Review, etc.

Green Top Health & Safety

At GTI, we have developed a culture that promotes an accident-free environment and provides the safest workplace possible for our employees, subcontractors, clients and others who enter or who near our construction sites. Our safety programs include partnering with the leaders in the insurance industry to develop the next generation of holistic personnel and properties protection. Through innovative training and education programs, we also equip our employees and subcontractors with the adequate resources they need to maintain high safety environment, reduce risk and improve loss control on every project that GTI manage.

Green Top Health & Safety

HSE CULTURE

GTI's HSE Cultures have supporting behaviors. The every behavior applies to all people regardless of their role with appreciation scheme that will ensure together we achieve the policy. The Key themes and involvements are listed below;

KEY THEMES	MANAGERS	SUPERVISORS	EVERYONE
Risk Management	Confront Risk	Perform Risk Awareness	Be Mindful
Policy & Standards	Implement	Ensure Compliance	Follow Rules
Communication	Communicate Openly	Encourage the Team	Speak up
Involvement	Stay Involved	Involve the Team	Get Involved

It is the policy of Green Top Contracting Co., here after called GTI, to provide a reliable and defect-free quality work and service that meets or exceeds client satisfaction as well as to comply with the requirements of ISO 9001: 2015 and to the project requirements in a timely and cost effective manner, while achieving excellence and safety for all personnel, the public and the environment. Quality is herein defined as conforming to the requirements and project specifications cited within this manual in all stages of construction.

It is the responsibility of personnel to ensure that the scope of work is executed in a manner consistent with the requirements of this manual and the Project Documentation (Drawings and Specifications). This assurance is achieved through implementation of the Quality Management System Plan. The Quality Control Program (QCP) is established to ascertain that all construction activities are performed in complete conformance with the approved construction drawings, relevant project specifications and international standard requirements.

All GTI personnel will comply with and support the QCP and all personnel who are directly involved in this project shall be continuously kept informed of contract requirements as work progresses. The authority and responsibility for administering the QCP is assigned to the Quality Manager.

QUALITY POLICY

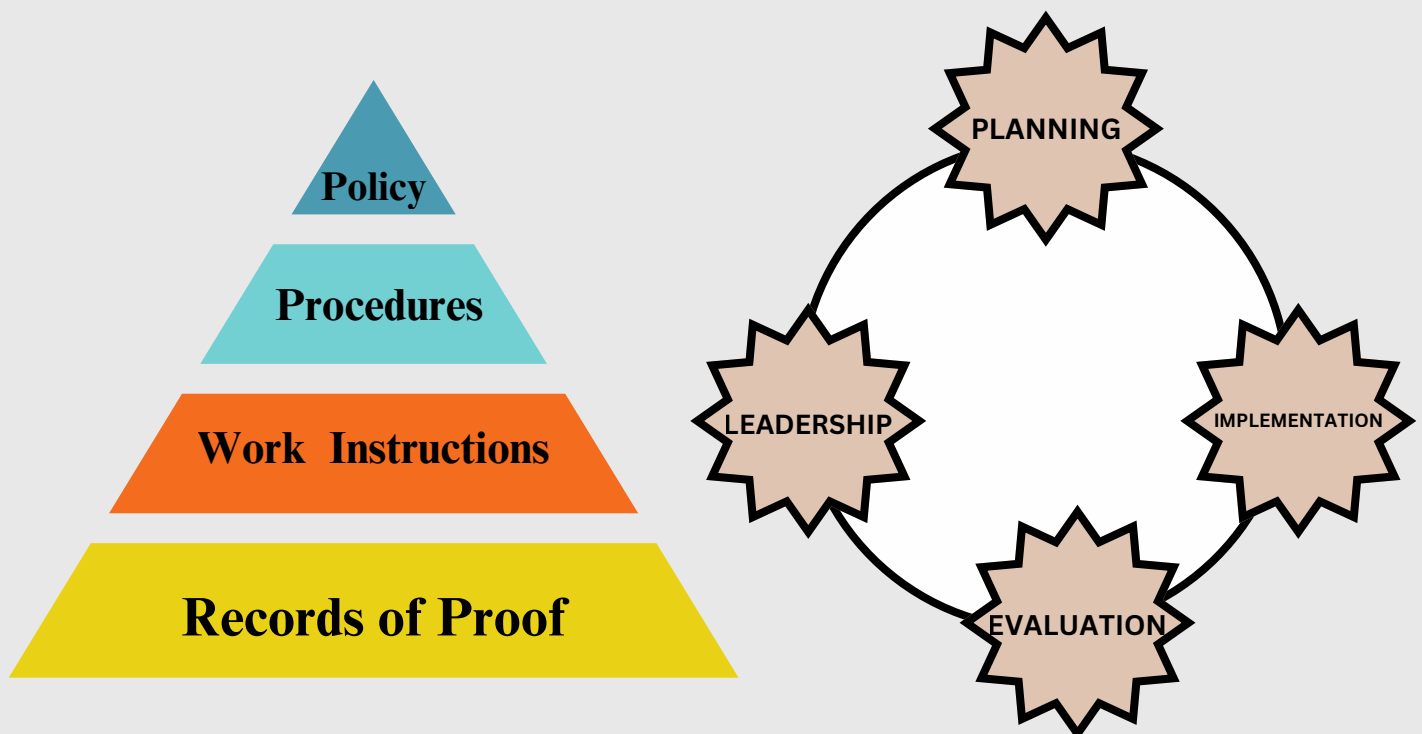

Green Top Contracting Co. Ltd. (GTI) is committed to providing high standard quality work, timely completion, providing a safe working environment and continually improving processes to enhance customer satisfaction by focusing on customer requirements

VALIDATING PROCESS

To maintain global standards and Client requirements, GTI periodically validates its Procedures, Equipment and other Facilities

SELF CONTROL PROTOCOLS

GTI uses self-control protocols (PPI's) implemented to ensure that our products are traceable and properly documents the projects delivered, by means of a comprehensive dossier along with the as-built documentation, certificates of materials, testing & commissioning protocols, and operating & maintenance instructions for end-users.

AWARDS & RECOGNITION

PROMINENT AWARDS & RECOGNITIONS

PROMINENT AWARDS & RECOGNITIONS

PROMINENT AWARDS & RECOGNITIONS

MEMORANDUM OF UNDERSTANDING

Memorandum of Understanding ("Agreement") is made and entered into on this 28th day of September, 2024, by and between:

Company A: **GREEN TOP CONTRACTING CO. LTD. (C.R. No. 2051062274)**, a company duly organized under the laws of Saudi Arabia, with its principal office located at 10th floor, NSH Tower, Al Khobar (hereinafter referred to as "Company A"),

AND

Company B: **GREEN TOP CONTRACTING CO. (C.R. No. 2051256597)**, a company duly organized under the laws of Saudi Arabia, with its principal office located at 3rd floor, Almofleh Building, AI Khobar (hereinafter referred to as "Company B").

WHEREAS:

- Both parties engage in Industrial Contracting and have identified mutual benefits in leveraging each other's resources to optimize efficiency and performance on their respective projects;
- Company A and Company B desire to enter into a formal and binding agreement to govern the use, exchange, and management of resources, including but not limited to personnel, equipment, vehicles, materials, and technical support, as required to meet project objectives and timelines and or to be submitted as supporting for Pre-Qualification.

NOW, THEREFORE, in consideration of the mutual covenants and promises contained herein, the parties herein agree as follows:

1. PURPOSE AND OBJECTIVE

The purpose of this MOU is to establish a strategic and cooperative framework between the Parties, under which the Parties may collaborate, associate, and support each other for business development, tender participation, prequalification, and execution of projects (like Saudi Aramco, SEC or other Ministry Projects), subject to the terms herein.

2. COMMITMENT TO PROVIDE AND SHARE RESOURCES

Both Parties commit to prioritizing the sharing, exchange, and support of resources to the extent reasonably required for business development, prequalification, tendering, and project execution purposes under this Agreement.

Such resources may include, but shall not be limited to:

- Technical expertise, methodologies, procedures, and know-how
- Engineering and design inputs
- Qualified and experienced manpower, including key technical and managerial personnel
- Project experience details, credentials, and supporting documentation
- Quality, HSE, and compliance-related documentation
- Any other information, inputs, or support reasonably required to meet prequalification or tender requirements

6. PERFORMANCE MONITORING AND REPORTING

Both parties agree to conduct regular performance reviews to evaluate the success of the resource exchanges, focusing on:

- Timeliness and availability of resources;
- Quality of resources provided;
- Project completion rates;
- Any disputes or operational inefficiencies encountered during the process.
- Quarterly Performance Reports: Both parties shall submit quarterly reports detailing the resources exchanged, any deviations from the Agreement, and performance metrics. This will ensure that the terms of the Agreement are being met and that any issues are promptly addressed.

7. FORCE MAJEURE

- Neither party shall be liable for any failure or delay in fulfilling their obligations under this Agreement due to events beyond their reasonable control, including but not limited to acts of God, war, civil disturbances, government action, or natural disasters.
- The party affected by such an event must provide written notice to the other party within 7 days, specifying the nature and expected duration of the event. Upon the cessation of the force majeure event, both parties shall resume their obligations as soon as practicable.

8. CONFIDENTIALITY AND PROPRIETARY INFORMATION

- Each party acknowledges that during the course of this Agreement, it may have access to confidential and proprietary information belonging to the other.

Both parties agree:

- To maintain the strict confidentiality of such information;
- Not to disclose any confidential information to third parties without the prior written consent of the other party;
- To use such information only for the purposes of fulfilling their obligations under this Agreement.
- This confidentiality obligation shall survive the termination or expiration of this Agreement for a period of five (5) years.

9. DISPUTE RESOLUTION

- In the event of a dispute arising out of or relating to this Agreement, both parties agree to first engage in good faith negotiations to resolve the issue.
- If the dispute cannot be resolved within thirty (30) days, it shall be submitted to binding arbitration under the rules of Saudi Ministry, with the arbitration taking place in Dammam. The decision of the arbitrator shall be final and binding on both parties.
- Each party shall bear its own costs related to the arbitration unless otherwise awarded by the arbitrator.

10. GOVERNING LAW AND JURISDICTION

- This Agreement shall be governed by and construed in accordance with the laws of Saudi Arabia, without regard to its conflict of law principles. Any legal actions arising out of this agreement shall be brought exclusively in the courts of Saudi Arabia.

11. MISCELLANEOUS PROVISIONS

- Amendments: This Agreement may only be amended by a written document signed by both parties.
- Severability: If any provision of this Agreement is found to be invalid or unenforceable, the remaining provisions shall remain in full force and effect.
- Entire Agreement: This Agreement constitutes the entire understanding between the parties and supersedes any prior oral or written agreements.

IN WITNESS WHEREOF, the parties have executed this Agreement as of the date first written above.
